Professional Summary

AI trainer experienced in LLM evaluation, RLHF annotation and Persian linguistic review. Uses structured guidelines to assess response accuracy, reasoning, instruction-following and cultural relevance.

Professional Experience

Mercor Aug 2026 - Present
Generalist Expert | Remote

- Evaluate and rank AI responses for factual accuracy, reasoning quality, relevance, clarity and instruction-following.
- Apply evaluation rubrics and annotation guidelines to identify hallucinations, safety risks and quality defects; provide actionable feedback for model improvement.

Invisible Technologies Aug 2025 - Aug 2026
Master - Persian Language Specialist - AI Trainer | Remote

- Created and validated Persian-language datasets using Python and PostgreSQL, checking grammar, meaning, cultural relevance and data consistency.
- Evaluated LLM outputs for accuracy, safety and instruction-following; annotated quality signals and failure cases, and reviewed dataset workflows for quality assurance.

Toronto Metropolitan University (TMU) Sep 2022 - 2024
Junior AI Engineer | Toronto, ON

- Built and tested research tools with Python, C/C++ and SQL; debugged software and analyzed project data.
- Improved workflows through testing and documentation; collaborated with faculty and researchers to communicate findings to technical and non-technical audiences.

Toronto Metropolitan University (TMU) May 2023 - Aug 2025
Research Assistant - Department of Statistics | Toronto, ON

- Analyzed research datasets with R and SAS and built predictive models to support forecasting and research objectives.
- Prepared reports and presentations explaining statistical findings to faculty and other stakeholders.

Relevant Skills

AI evaluation: Side-by-side response comparison, preference ranking, RLHF, rubric-based scoring, instruction-following checks, hallucination detection and model safety.

Annotation & quality: Text annotation, dataset validation, consistency checks, error analysis, quality assurance and actionable written feedback.

Language review: Persian linguistic evaluation, grammar and meaning checks, cultural relevance, clear documentation and analytical reasoning.

Tools & analysis: Python, SQL, PostgreSQL, R, SAS, JavaScript, Excel/Google Sheets, ChatGPT, Jira, Unix/Linux, VMware and Visual Studio.

Education

Toronto Metropolitan University (TMU) Jan 2022 - Jan 2025
Bachelor of Science, Mathematics and Its Applications (Honours); Minor in CS & Politics
GPA: A- | **Leadership:** Vice President, Department Student Association
Thesis: Applications of Statistics and Probability
Coursework: Data Analysis, Probability Theory, Linear Algebra, Database Systems, Statistics
